Data Science South Korea/ US Global Lab

Become a part of the first cohort of students who will work on exciting global projects between Hanyang University in Seoul and US Universities in Chicago

The Data Science South Korea/US (DSKUS) Global Lab is a cross-national project between Hanyang University in Seoul, DePaul University and Indiana University in the US. With the support of the US Embassy in South Korea and the US State Department, a selected group of students from the three universities will collaborate virtually, using data science to tackle real-world international policy challenges ... see how your skills can help build a better world.

Receive a
scholarship
of \$1500

Get chance to travel to Chicago for a week
to meet face-to-face with your team members
and learn from data science industry leaders
in South Korea and the US

Travel and accommodation expenses will be covered by the program. Participants will also earn course credit and be awarded a ₩1,750,000 krw scholarship.

Deadline to submit online applications: December 20, 2021

Who is eligible?

- Hanyang students with an interest in Data Science and international policy
- Open to graduate students or undergraduates (upperclassman only, 3rd or 4th year)
- Proficient English speaking ability required (equivalent to TOEIC level B1)
- Priority will be given to graduate students, as well as Korean citizens or permanent residents

How to Apply?

- **Application window:**
2021/11/24 – 2021/12/20
- **Program Date:** Spring Semester 2022
- **Submission Site:**
