

2025 1학기 컴퓨터소프트웨어학부 CSE융합세미나

장소

ITBT관 911호

날짜 / 시간

2025.06.04 16:00~18:00

Upcoming Talk

김성혁

상무 / LG전자

Sensor as an AI Service for
Smart Space

Sensors in consumer electronics enhance user convenience and experience, and their rapid development has led to commoditization. Integrated with AI, sensor data powers high-performance, user-centric smart applications. LG's Artificial Intelligence centers on real-time AI sensing and contextual understanding, foundational for creating smart life solutions. This presentation will explore LG Electronics' AI sensing technologies, illustrating how they monitor streaming data to provide contextual insights across products. This presentation will also introduce LG Electronics' next-generation solutions, aiming to realize Sensor as an AI Service for Smart Homes, ushering in a new era of responsive.
